## PROFILE SUMMARY

---

Results-driven Full Stack Web Developer with a BCA degree and a passion for self-taught learning. Proficient in developing dynamic, responsive websites and web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) along with experience in modern web development frameworks like Tailwind CSS. Committed to continuous learning and development, with a focus on applying both theoretical knowledge and practical skills to solve complex technical challenges

## SKILLS

---

**Primary:** JavaScript, Python, HTML,CSS, SQL

**FrameWorks:**Reactjs

**Other Skills:** Bootstrap,Tailwind,Vite, RESTful APIs,Git

## EDUCATION

---

**Mar Augusthinose College**

**Bachelor of Computer Application**

2021-2024

CGPA: 6.4

Ramapuram,Kottayam,Kerala

Graduated, May 2024

## EXPERIENCE

---

Junior full-stack developer -Freelance

Jan 2024-Present

Full-stack developer intern at Luminar Technolab ,Kakkanadu

May 2024-Nov 2024

## PROJECTS

---

### Media player website

**Tools:** React, Node.js, JSON Server, Axios, REST APIs

A dynamic media player website that allows users to manage their video library by adding, removing, and deleting video sourced from YouTube.

#### Responsibilities:

- Developed a user-friendly interface with React, enabling seamless video management through intuitive controls.
- Managed data using a JSON server, efficiently handling storage, retrieval, and manipulation of video data.
- Utilized Axios for making HTTP requests to facilitate real-time updates to the video library, ensuring a responsive user experience.
- Integrated the YouTube API to fetch and display videos, allowing users to explore and add content to their media library.
- Leveraged Node.js for backend operations, enhancing the scalability and performance of the application..

### Portfolio website

**Tools:**React,Tailwind CSS,HTML,CSS

Developed a responsive portfolio website to showcase projects and technical skills.

#### Responsibilities:

- Implemented a modern, clean design utilizing Tailwind's utility-first framework for efficient, maintainable styling.
- Ensured cross-device compatibility, optimizing the user experience on both desktop and mobile platform

### BMI Calculator

Built a tool to calculate Body Mass Index (BMI) based on user input, providing instant feedback on health metrics.

### Notes App

Created a simple notes application allowing users to create and store notes, with a minimalistic design for focused productivity.
